SUMMARY

Software Engineering graduate (ASTU, 2026) with hands-on experience in AI, computer vision, and full-stack development. Built an Amharic handwritten OCR system as a final-year project and completed an OCR data pipeline internship at the Ethiopian Artificial Intelligence Institute. Experienced in Python, CVAT, React, Node.js, MongoDB, testing, and debugging. Seeking a junior AI/ML, full-stack, or QA engineer role.

PROFESSIONAL EXPERIENCE

Intern 06/2025 – 08/2025
Ethiopian Artificial Intelligence Institute Addis Ababa, Ethiopia
- Annotated and preprocessed document images in CVAT for an Optical Character Recognition (OCR) pipeline, applying segmentation and cleaning steps.
- Ran quality-control checks to catch labeling errors and keep annotations consistent.
- Gained practical experience in data management, quality-focused workflows, and AI/ML applications.

Intern 07/2024 – 09/2024
Everlink Solutions Addis Ababa, Ethiopia
- Built a full-stack lottery web application (React, Node.js, MongoDB) with authentication, ticket management, and database operations.
- Tested and debugged the application before delivery.

EDUCATION

Software Engineering 05/2022 – 06/2026
Adama Science and Technology University Adama,Ethiopia
Final-year project: Amharic Handwritten OCR Web Application

TECHNICAL SKILLS

Professional
Problem-Solving, Teamwork, Time Management, Documentation

Full-Stack Development
JavaScript, React, Node.js, Express, MongoDB, REST APIs, HTML, CSS

Testing
Manual Testing, Debugging, Bug Reporting

AI & Machine Learning
OCR, Computer Vision, Image Preprocessing, Data Annotation (CVAT), Google Colab , OpenCV ,PyTorch

Languages and Tools
Python, Java, SQL, Git, GitHub, VS Code, Microsoft Office, Google Workspace

PROJECTS

Amharic Handwritten OCR Web Application (Final-Year Project)
- Collected and annotated a custom Amharic handwriting dataset in CVAT to train and evaluate the recognition model.
- Built an AI-powered web application that recognizes handwritten Amharic text from uploaded images and returns editable text.
- Contributed to the web interface and AI/ML integration as part of a team project.
- Tech: Python, React, CVAT, computer vision, Google Colab

Church Management Website
- Built a full-stack site for managing church events, sermons, gallery content, and donations. Tech: React, Node.js, MongoDB.

Health Link
- Built a secure healthcare management system for patient records and prescriptions, with an intuitive UI and core clinical workflow features.
